

O BALL WITH RATTLE

Designed to be easy to grasp for even the littlest fingers, this toy encourages the development of fine motor skills with every shake. There are 29 total finger holes, so even inexperienced fingers can hold on tight and shake with everything they've got. Your baby will love watching the bright beads inside each rattle clickity-clack with every shimmy and shake.

SHAKE, SHAKE

With your baby on your lap, shake the OBall and watch your baby's reaction when she hears the rattling noises and sees the jumping beads. Talk about the sounds you hear and the colors you see.

YOUR TURN

Shake the OBall in different ways: hold it high, hold it low, shake it fast, shake it slow. You do it once "My turn" and then hand the OBall to your baby "Your turn".

ROLLING ALONG

Roll the ball just out of your baby's reach and encourage him to move towards the ball to get it. At first he may try to reach out with his arms, but soon he will be crawling towards it.

FINGERPLAY

Help your baby develop fine motor skills. Encourage him to grab the OBall with his fingers. First, try with both hands, then see if your baby can hold the ball using only one hand.
